X4Pro - PFNS

Reaction:92-U-235(N,F),PR,NU/DE Quantity:MFQ:y=Data(En,E2) Datasets:2 Points:121
X4Pro, by V.Zerkin, Vienna, 2026, ver.2026-09-24 //running:2026-09-25 00:45:39

FIG. 12. Ratio of measured PFNS by a 1.32 MeV Maxwellian distribution for four incoming neutron energies. The horizontal bars give the bin size while the points are placed at the mean energy position of the energy distribution within each bin. The JEFF3.3 and ENDF/B VIII.1 evaluations are plotted for comparison. Data from Refs. [4,29,30] were also added for comparison. The corresponding energies are given in the legend.
